Sculptural and Artistic LED Displays

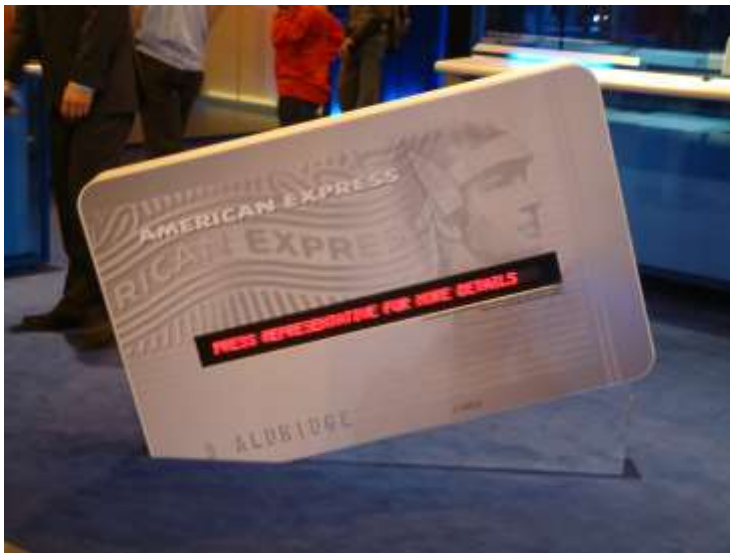

LEDsynergy LED Displays are more and more being used for sculptural as well as functional forms. With careful and imaginative use of materials and casing design we can deliver an eye-catching and pleasing item of 'art' that performs a function and conveys information at the same time.

Bespoke LED Displays and Full Colour Screens

Sculptural and Artistic LED Displays

For an added edge to advertising or promotional event an LED display increases the potential for your product or company to be seen by a larger audience. A moving full colour message attracts the eye and draws peoples attention but allows promotional information and advertising to be broadcast at the same time, increasing awareness and potential interest in your product, company, launch or event. The scope for use is limited only by your imagination. Using standard construction or a bespoke installation it is a proven and reliable means of adding that extra something to any advertising and marketing campaign.

Impressive Site Entrance LED Displays

Site Entrance displays are of paramount importance to any company or venue and our Full Colour LED Displays are a truly superb medium for making that all important first impression on your existing and potential new customers. It can be exciting, imaginative, colourful and so dynamic that your attention is grasped and held. The content for the displays can be as imaginative as you would like it to be with stunning graphics, animated images and dynamic video images to wow your audience.

Once it has your attention it is an essential tool for informing people, whether it be the general public, event visitors, staff, students or customers.

Bespoke LED Displays and Full Colour Screens

Powerful Advertising Tool for Retail

Full Colour Video Displays are becoming the norm on the high street in nearly all retail outlets. They have replaced the traditional static printed posters giving the customer a far better shopping experience. The latest fashions, trends, promotions and offers can be brought to the customer immediately.

Bespoke LED Displays and Full Colour Screens

State of the Art Sales and Marketing Tool

Bespoke LED Displays and Full Colour Screens

Bespoke Inbuilt LED Displays

The LED Displays can be artfully inbuilt into any type of structure, whether it's a wall, floor, ceiling, vehicle, or bespoke casing. In the examples you can see here the displays can be used for functional use as in the information display/clock within the lorries or something very artistic within a wall or circular ceiling void for maximum impact.

The lumination properties allow the display to be placed behind semi opaque materials so that for all intents and purposes the finished surface looks clean and smooth, however when the LED luminates from behind it shines through thus showing only when the message passes.
